Courtenay, BC | Shayan.moakher@gmail.com | 778-302-7331

PROFESSIONAL SUMMARY

Client service professional with current BC Public Service experience, more than two years in banking, and hands-on academic experience in operating systems, virtualization, software development, and databases. Experienced in explaining processes clearly, resolving service questions, working with confidential information, and coordinating issues with internal teams. Brings a practical technical foundation, organized documentation habits, and a responsive approach to user support.

TECHNICAL SKILLS

Operating systems & virtualization: Windows Server (lab experience), Ubuntu Linux, Hyper-V, virtual machine setup and management, SSH
Programming & web: Java, JavaScript, Python, HTML, CSS, Bootstrap, jQuery; MVC architecture
Databases & tools: MySQL, Oracle, SQL, Git, GitHub, Visual Studio Code, Microsoft Word and Excel
Technical foundations: Operating system concepts, application architecture, database integration, web technologies

PROFESSIONAL EXPERIENCE

Customer Service Representative | Government of British Columbia

Courtenay, BC | June 2026 - Present

- Identify customer needs and provide accurate information, guidance, and referrals about government services, policies, programs, and application requirements.
- Explain procedures, eligibility criteria, and documentation requirements in clear, accessible language; help customers understand next steps.
- Use government systems to process authorized driver licensing and identification transactions in accordance with established procedures.
- Review identification and supporting documents, verify information, and identify missing or incomplete documentation.
- Manage competing customer requests while protecting confidential personal information and maintaining accuracy and service standards.

Garage Door Technician | Harbour Door Services

Victoria, BC | December 2025 - June 2026

- Investigated mechanical and electrical service issues, assessed possible causes, and used structured problem-solving to determine next steps.
- Explained technical findings and recommended solutions to customers in clear, practical language.
- Documented work completed, service findings, and follow-up needs while coordinating daily calls and changing priorities.

Business Banking Advisor - Advice Centre | Coast Capital Savings

Vancouver, BC | June 2022 - September 2023

- Provided phone and digital support to business banking members, identified service needs, and guided them through account and banking processes.
- Helped members with digital banking access and login-related questions; coordinated issues with internal teams when additional technical support was needed.
- Used computerized banking systems to retrieve information, maintain records, and support member requests while protecting sensitive financial data.
- Reviewed business, lending, and financial documents for completeness and accuracy, and worked with internal departments to resolve documentation issues.

ADDITIONAL PROFESSIONAL EXPERIENCE

Member Services Representative | Coast Capital Savings

Burnaby, BC | August 2021 - June 2022

- Responded to member inquiries about banking services, account procedures, and digital banking features; guided customers through online and mobile banking questions.
- Processed financial transactions using computerized banking systems, verified account information, and followed privacy and security procedures.
- Received a 10/10 member satisfaction rating and management recognition for service and performance.

ACADEMIC TECHNICAL PROJECTS & LABS

Car Dealership Application | SENG Process | Java, MVC, MySQL, Git

- Collaborated with a four-person team to develop a Java car dealership application using the Model-View-Controller (MVC) architecture and a MySQL database.
- Documented stakeholder requirements, including use cases, functional and non-functional requirements, and user stories; prepared interview questions and a questionnaire to clarify project needs.
- Coordinated task assignments across the team and used Git for version control and code reviews to organize contributions and integrate shared work.

Operating Systems & Virtualization Labs | Windows Server, Hyper-V, Ubuntu, SSH

- Installed and worked with Windows Server in a lab environment; used Hyper-V to create, install, and manage virtual machines, including Ubuntu Linux.
- Connected to virtual machines using SSH and performed file management and configuration tasks across multiple systems.

Web Development Projects | HTML, CSS, JavaScript, Bootstrap

- Built websites and course assignments using HTML, CSS, JavaScript, and Bootstrap, applying page layout, styling, and interactive web features.
- Created a personal portfolio website and practiced organizing, testing, and refining front-end code.
